

ABSTRACT OF THE DISCLOSURE

5 A sailing accessory for selectively receiving and holding
personal accessories of a user and providing convenient access to
the accessories for a helmsman. The sailing accessory includes a
top member and a bottom member. The top member includes a slot
which extends therethrough. The slot is designed for receiving a top
10 portion of a pedestal guard. The top member defines a work surface.
The bottom member is operationally coupled to the top member.
The bottom member includes a front edge designed for abutting a
back side of the pedestal guard.
